

TRIDENT

GANG FLAIL
GRASS MOWER
RANGE

Spearhead 

Heavy duty mowers
From 4.3m to 6.0metres

Spearhead 

Quality - that's the point

THE TRIDENT 4000

Mowing 3ha per hour (8 acres) of parkland when matched to tractors of 65 to 90bhp. Wet, dry, long or short grass, the Trident will mow and mulch and leave a finish to be proud of. With no cylinders or blades to regrind or sharpen, unplanned down time is a thing of the past! The Trident will mow for the full working shift without a hitch. The special scoop flails have a tip speed of 45m per second to shear the grass cleanly and leave a finish comparable with the best. Simple adjustments control the cutting height.

THE TRIDENT 5000

With a cutting width of 5m and is tractor matched to power units of 75-100hp. Outputs of over 25ha (65 acres) in a working day are normal, day after day, week after week, with no downtime for sharpening or repairs. Safety in public places is a major positive factor with the Trident as foreign objects are discharged down on to the ground rather than sideways as happens with

rotary mowers. Where debris is unusually prevalent, optional rear rubber flaps are available to contain the discharged material. Drink cans and other material that commonly damage cylinder mowers cause no problems to the robust clean cutting flails of the Trident. Output is increased as forward speed can be maintained on tight turns. The generous overlap between the cutting units encourages continuous cutting without leaving any unsightly strips.

THE TRIDENT 6000HD

With a 2.8m wide front mounted centre unit which mows the grass before it is run over by the tractor wheels for the cleanest possible cut. The rear wing units are fully mounted on the tractor three point linkage to give a well balanced and highly manoeuvrable unit. The versatile "C" flails will give a lawn like finish in good conditions and will also cut and mulch out of control vegetation as thick as your fingers.

Please call for specification details.
